

Communication Between Contin

charmers

flows

synchroizedmutabletypes (Atomic*types, synchroizedcollections, etc)

❗ Avoid mutable shared state and never use unsynchronized mutable shared state

Communication Between Coroutines

- channels
- flows
- synchronized mutable types (Atomic* types, synchronized collections, etc)
- ❗ Avoid mutable shared state and never use unsynchronized mutable shared state

Testing Coroutines

`kotlinx-coroutines-test`

How long will the following test take to run?
